DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11 and 19, drawn to a client-server network for managing internet protocol voice data, classified in class 379, subclass 88.17.

II. Claims 12-15, drawn to a method of monitoring an incoming voice mail message, classified in class 379, subclass 100.05.

III. Claims 16-18, drawn to automatically updating an address book database, classified in class 379, subclass 88.21.

2. The inventions are distinct from each other because of the following reasons:

The inventions of Groups I and III do not require monitoring an incoming voice mail message. The inventions of Groups I and II do not require automatically updating an address book database. The inventions of Groups II and III do not require managing internet protocol voice data packets.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate

status in the art because of their recognized divergent subject matter, and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.
